EXPERIENCE

FullStack Developer

Baufest

August 2022 - April 2024

Client: D&C Logistics

Project: Internal Logistics System

Provided support and enhancements to the internal system of a Chilean logistics company, developing functionalities and optimizing workflows to increase operational efficiency. My work included creating and managing logistics data tables and implementing them in the system. On the frontend, I worked with Angular and Bootstrap to build responsive components and interactive forms, facilitating order management and shipment tracking in an intuitive manner. On the backend, I used ASP.NET Core following SOLID principles and Clean Architecture to ensure a robust and maintainable structure, developing RESTful services integrated with the frontend and other systems. Using SQL Server, I designed optimized queries and stored procedures for fast data access. Additionally, I followed a repository system for code organization and established a continuous integration and deployment pipeline with Git, TeamCity, and Octopus, ensuring smooth delivery and minimizing production errors. Postman was essential in the testing phase, guaranteeing the quality and performance of the implemented REST services.

Duration: 1 year and 4 months

Client: Baufest

Project: Internal Sports Betting System

Development of an internal sports betting platform for Baufest during the 2022 FIFA World Cup in Qatar. Using .NET for business logic and SQL Server to manage user data, bets, and real-time results, the application allowed employees to make predictions and participate in friendly bets. With Blazor as the frontend framework, I designed an interactive and dynamic interface that facilitated a smooth user experience, optimizing interaction with bets and live result tracking.

Duration: 3 months

EDUCATION

High School Diploma: Physical-Mathematical Diversification - Liceo N°43

COMPLEMENTARY EDUCATION

ASP.NET Core - Solid and Clean Architecture - Udemy

SQL Server: Desde Cero a Nivel Profesional - Udemy

Angular: De cero a experto - Udemy

Java & React Bootcamp - Baufest

User Experience (UX) Design - Google

Python Jóvenes a Programar - Plan Ceibal

.NET Jóvenes a Programar - Plan Ceibal
